Description

Preconditions

- The Hotel Booking API is running.
- Test data contains a reservation with:
  - `firstName = anna`
  - `lastName = novak`

Steps to Reproduce

1. Send a GET request to:
   `http://localhost:3001/reservations?firstName=anna&lastName=novak`

Expected Result

The API should return the reservation ID matching both the specified first name and last name.

Actual Result

The API returns an empty array: []

The reservation matching `firstName=anna` and `lastName=novak` is not returned.
